

# Year 9 AP2 – Maths

## How to revise Maths:

- **Use the attached revision list** to practice all of the topics that are going to come up on the assessment. Make sure you focus on the ones you find the most difficult!
- **Use DrFrostMaths** at [DrFrost.org](http://DrFrost.org) to help revise and practice topics you would like to focus on. You can use the guidance videos if you have forgotten anything from your lessons.
- **Use online maths videos** like Corbettmaths to watch walkthroughs of questions like the ones on your assessment. This will help you to understand the steps you need to take to solve problems.

## Additional Information:

- **Speak to your teacher** about any topics you don't understand. They will be able to help you or direct you to revision material that can support your own practice.
- **You are allowed a calculator** for your assessment. Feel free to use one when practicing and make sure you are familiar with calculator methods your teacher has shown you during your lessons.
- **Make use of your exercise book** when revising. Your own notes will help you to remember your lessons on the topics you need to know.

## Revision list:

- Calculating with fractions
- Standard form
- Square roots
- HCFs and LCMs
- Prime factors
- Money calculations
- Methods of addition and subtraction
