Subject: Update on School Systems and Parental Communication

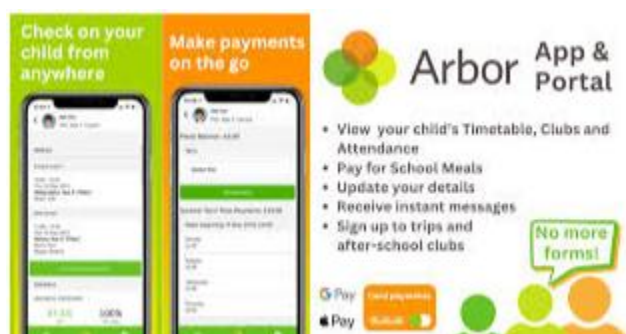

Dear Parents and Carers,

We are currently in the process of migrating our Management Information System (MIS) from SIMS to Arbor. This system is used to manage parent, pupil, and staff details in school. While the data we process remains the same, the way we access and manage this information will change slightly. We want to assure you that this transition has been carefully planned with data protection and cybersecurity as top priorities, so your personal data will remain safe and secure.

During this migration, we do not expect any disruption to our usual communication with you. We appreciate your patience as our staff get familiar with the new system, and we will do everything possible to keep any inconvenience to a minimum.

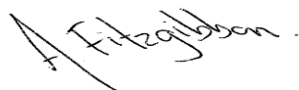

At this time, we will continue to use Edulink as our main method for communicating with parents and carers but will update you more in January regarding the next steps for Arbor. There may be a few slight changes to the wording and login details on Edulink, but we will keep you informed once we have more information.

In the meantime, please feel free to download the free parent app from the Apple App Store or the Google Play store for androids.

We will also keep you updated on the progress of the transition and any new features that may become available. If you have any questions in the meantime, please do not hesitate to contact the school directly.

Yours sincerely,

Mr A Fitzgibbon
Principal
