

# Year 11 Feb Mock Revision List

## Geography

### How to revise Geography:

- RAG rate the revision list opposite; red for areas of weakness, amber/yellow for areas you feel 'okay' in, and green for areas you feel confident in.
- Choose one of your weak topics to focus on using the revision list.
- Using the knowledge organiser, make some Q&A flashcards for this topic. Alternatively, you can look/cover/ write/ check.

### Paper 1:

- Managing climate change – both mitigation methods (international agreements, renewables etc) and adaptations
- Why people live in areas at risk from a tectonic hazard
- Effects of tectonic hazards
- Tropical storms – immediate and long term responses. Using a case study – Typhoon Haiyan.
- Deforestation – why it is happening and the effects of it. Using a case study – Amazon Rainforest.
- Animal adaptations in the desert
- Coastal landforms such as headlands and bays
- Coastal processes

### Additional Information:

You will be expected to:

1. Read and complete maps and graphs
2. Use geographical terminology confidently
3. Describe and explain processes and concepts

## **Paper 1 continued:**

- Flood management scheme in the UK
- River features created by erosion and deposition

## **Paper 2:**

- Migration – push and pull factors
- Managing environmental issues
- Urban greening creating opportunities in UK cities
- Water and energy conservation to make cities more sustainable
- International migration being caused by uneven development
- Nigeria – why is it important
- How can industry encourage development
- Globalisation and how that changes the UK
- Transport improvements and the impact they have on the future of the UK
- Food, energy and water overview
- Extracting fossil fuels – advantages and disadvantages
